Proper Citation: Species 2000 (RRID:SCR_008231)

Description: Species 2000 is a federation of database organizations working closely with users, taxonomists and sponsoring agencies. The goal of the Species 2000 project is to create a validated checklist of all the world's species (plants, animals, fungi and microbes). This is being achieved by bringing together an array of global species databases covering each of the major groups of organisms. Each database covers all known species in the group, using a consistent taxonomic system. The participating databases are widely distributed throughout the world and currently number 52. The existing global species databases presently account for some 60% of the total known species, so substantial investment in new databases will be needed for full coverage of all taxa to be achieved.

Synonyms: Species 2000

Resource Type: nonprofit organization

Keywords: fungus, animal, global, microbe, organism, plant, specie, taxonomy, taxonomy and identification databases

Resource Name: Species 2000

Resource ID: SCR_008231

Alternate IDs: grid.438063.a, nif-0000-21377, ISNI: 0000 0001 0496 8228

Alternate URLs: <https://ror.org/04m098c22>

Record Creation Time: 20220129T080246+0000

Record Last Update: 20260801T190340+0000

Ratings and Alerts

No rating or validation information has been found for Species 2000.

No alerts have been found for Species 2000.
