Proper Citation: E-Prime (RRID:SCR_009567)

Description: A suite of applications to fulfill all of your computerized experiment needs. Used by more than 15,000 professionals in the research community, E-Prime provides a truly easy-to-use environment for computerized experiment design, data collection, and analysis. E-Prime provides millisecond precision timing to ensure the accuracy of your data. E-Prime's flexibility to create simple to complex experiments is ideal for both novice and advanced users. The E-Prime suite of applications includes: * E-Studio ? Drag and drop graphical interface for experiment design * E-Basic ? Underlying scripting language of E-Prime * E-Run ? Once the experiment is generated with a single click, E-Run affords you the millisecond precision of stimulus presentation, synchronizations, and data collection. * E-Merge ? Merges your single session data files for group analysis * E-DataAid ? Data management utility * E-Recovery ? Recovers data files

Abbreviations: E-Prime

Synonyms: E-Prime 2.0

Resource Type: software resource, software application

Keywords: experimental control, microsoft, magnetic resonance, visual basic, win32 (ms windows), windows, windows vista, windows xp

Resource Name: E-Prime

Resource ID: SCR_009567

Alternate IDs: nlx_155747

Alternate URLs: <http://www.nitrc.org/projects/eprime>

Record Creation Time: 20220129T080253+0000

Ratings and Alerts

No rating or validation information has been found for E-Prime.

No alerts have been found for E-Prime.

Usage and Citation Metrics

We found 162 mentions in open access literature.

Listed below are recent publications. The full list is available at [kravitz2](#) .

Guo T, et al. (2025) An fMRI dataset for investigating language control and cognitive control in bilinguals. *Scientific data*, 12(1), 889.

Bracco M, et al. (2025) Protocol to assess changes in brain network resistance to perturbation during offline processing using TMS-EEG. *STAR protocols*, 6(1), 103622.

Sklivanioti Greenfield M, et al. (2025) Behavioral intervention with task repetition compared to pharmacological intervention with SSRI for enhancement of cognitive control in emotional and non-emotional settings. *Psychopharmacology*, 242(12), 2817.

H??den GP, et al. (2025) Longitudinal study of functional brain networks for processing infant-directed and adult-directed speech during the first year. *iScience*, 28(10), 113583.

Galigani M, et al. (2025) Frequency-tagging EEG reveals spontaneous categorical discrimination of visual self-identity. *iScience*, 28(10), 113562.

Vaz Batista M, et al. (2025) The DEBBRAH trial: Trastuzumab deruxtecan in HER2-positive and HER2-low breast cancer patients with leptomeningeal carcinomatosis. *Med (New York, N.Y.)*, 6(1), 100502.

Ashtari M, et al. (2024) Central visual pathways affected by degenerative retinal disease before and after gene therapy. *Brain : a journal of neurology*, 147(9), 3234.

Wang Y, et al. (2024) Associations between capacity of cognitive control and sleep quality: a two-wave longitudinal study. *Frontiers in psychology*, 15, 1391761.

Fregni S, et al. (2024) Initial learning in the brain: From rules to action. *Imaging neuroscience (Cambridge, Mass.)*, 2.

Sun Y, et al. (2024) P1 evoked by facial expression images is enhanced in Parkinson's disease patients with depressive symptoms. *Frontiers in aging neuroscience*, 16, 1423875.

Zhao Y, et al. (2024) Modulation of hemispheric asymmetry in executive control of attention in schizophrenia with atypical antipsychotic treatment: Potential benefits of olanzapine. *Schizophrenia research. Cognition*, 36, 100306.

Greenfield MS, et al. (2024) Emotional dysregulation and stimulant medication in adult ADHD. *Journal of psychiatry & neuroscience : JPN*, 49(4), E242.

Cardoso S, et al. (2024) Attentional deficits in fibromyalgia: an ERP study with the oddball dual task and emotional stroop task. *BMC psychology*, 12(1), 104.

van der Heijden AC, et al. (2024) Targeted memory reactivation to augment treatment in post-traumatic stress disorder. *Current biology : CB*, 34(16), 3735.

Ciricugno A, et al. (2024) A chronometric study of the posterior cerebellum's function in emotional processing. *Current biology : CB*, 34(9), 1844.

Xu HZ, et al. (2024) Are older adults less generous? Age differences in emotion-related social decision making. *NeuroImage*, 297, 120756.

Trajkovic J, et al. (2024) Transcranial magnetic stimulation effects support an oscillatory model of ERP genesis. *Current biology : CB*, 34(5), 1048.

Wolfs EML, et al. (2023) The cerebellum during provocation and aggressive behaviour: A 7 T fMRI study. *Imaging neuroscience (Cambridge, Mass.)*, 1.

Lu TH, et al. (2023) Harm Avoidance is Correlated with the Reward System in Adult Patients with Attention Deficit Hyperactivity Disorder: A Functional Magnetic Resonance Imaging Study. *Clinical psychopharmacology and neuroscience : the official scientific journal of the Korean College of Neuropsychopharmacology*, 21(1), 99.

Ikeda Y, et al. (2023) The Structure of Working Memory and Its Relationship with Intelligence in Japanese Children. *Journal of Intelligence*, 11(8).
