Proper Citation: XULA RCMI Cell and Molecular Biology Core (RRID:SCR_010218)

Description: Core facility that provides the following services: Bioassays service, Functional studies service, Gene expression service, Molecular biology service, Mass spectrometry based global scale protein profiling, 2D Gel Electrophoresis, Data analysis services. The RCMI Cell and Molecular Biology Core (CMB Core) provides focused services using cell and molecular biological techniques. It also provides access, upkeep and training on ?state of the art? equipment. Funding by the RMCI allows these services to be offered at minimal cost to users of the core. Technical services and necessary consumable supplies are provided to support cancer research projects at Xavier University. The long term goal of the Cell and Molecular Biology Core is to enhance the overall biomedical research capabilities at Xavier University.

Abbreviations: XULA RCMI CMB Core

Resource Type: core facility, service resource, access service resource

Keywords: cell proliferation assay, cell viability assay, real-time pcr, drug binding assay, reverse transcribed polymerase chain reaction, immunoprecipitation, western blot analysis, recombinant protein production, protein purification, dna extraction, rna extraction, dna purification, protein expression profiling, two dimensional polyacrylamide gel electrophoresis, data visualization, pathway data analysis
