Proper Citation: UMass Medical School Flow Cytometry Core Lab (RRID:SCR_012630)

Description: The Flow Cytometry Facility, located at UMass Medical School in Worcester, provides a wide variety of cytometry services for internal and external investigators with state-of-the-art sorting and analyzing capabilities. For analysis we currently have three 4-color FACSCaliburs, a 2 laser LSR II, a 4 laser LSRII and a 5 laser LSRII. Our cell sorters include a 3 laser Beckman Coulter MoFlo XDP hi-speed cell sorter, an all digital 3 laser 11 color FACS Vantage DE DiVa sorter, a 19 parameter, 5 laser FACS Aria, and a 14 parameter, 4 laser FACS Aria dedicated to BSL3 cell sorting. Two LSR II's and one Calibur are dedicated for investigator self use, after training is completed. We encourage all investigators to come to the main lab at S5-322 and learn how flow cytometry can be applied to your research. Rates are based per hour and billed in 15 minute increments. Training rates are based per person, per hour. Sorting includes a 1 hour setup fee unless there is a second sort on that instrument that day, in which case each sort is billed 30 minutes for setup. BSL3 Sorting is billed 30 minutes for setup in all cases

Abbreviations: UMMS Flow Cytometry Core Lab

Synonyms: University of Massachusetts Medical School Flow Cytometry Core Lab

Resource Type: core facility, service resource, access service resource

Resource Name: UMass Medical School Flow Cytometry Core Lab

Resource ID: SCR_012630

Alternate IDs: SciEx_578

Record Creation Time: 20220129T080311+0000
