exact Low Resolution Electromagnetic Tomography

RRID:SCR_013830

Type: Tool

Proper Citation

exact Low Resolution Electromagnetic Tomography (RRID:SCR_013830)

Resource Information

URL: <http://www.uzh.ch/keyinst/loreta>

Proper Citation: exact Low Resolution Electromagnetic Tomography (RRID:SCR_013830)

Description: Software application which computes cortical three-dimensional distribution of current density of the brain based on the scalp-recorded electric potential distribution. The exact low resolution brain electromagnetic tomography method has the property of exact localization to test point sources, yielding images of current density with exact localization, albeit with low spatial resolution. eLORETA has no localization bias even in the presence of structured noise. Deep structures, such as the anterior cingulate cortex and mesial temporal lobes, can be correctly localized with these methods.

Abbreviations: eLORETA

Synonyms: Exact Low Resolution Brain Electromagnetic Tomography

Resource Type: software application, software resource

Keywords: LORETA, EEG, MEG, brain, image, electromagnetic tomography

Availability: Free, Not ready for public distribution, Must have administrator rights

Resource Name: exact Low Resolution Electromagnetic Tomography

Resource ID: SCR_013830

Old URLs: <http://www.uzh.ch/keyinst/loretaOldy.htm>
