Description: Research project examining how biological, psychological, and environmental factors during adolescence may influence brain development and mental health. Using brain imaging and genetics, the project will help develop prevention strategies and improved therapies for mental health disorders in the future., THIS RESOURCE IS NO LONGER IN SERVICE. Documented on September 16,2025.

Synonyms: IMAGEN Consortium, IMAGEN Project, IMAGEN Study

Resource Type: organization portal, portal, consortium, data or information resource, project portal

Defining Citation: [PMID:21102431](#)

Keywords: adolescence, teen, mental, health, study, brain, development, neurological, prevention, therapy, disorder, psychology

Funding: European Commission ;
