Proper Citation: GE: Biacore 3000 Real Time Biomolecular Interaction Analyzer (RRID:SCR_018044)

Description: Biacore 3000 processing unit is an established, label-free system for detailed studies of biomolecular interactions. The system delivers comprehensive characterization of the interaction, answers questions about the rate constants, affinity, specificity, and determines the active concentration of components. The ability to recover and transfer interaction partners directly to MALDI targets for identification and further characterization makes the system highly applicable to fast identification of unknown interactants.
