Description: Eppendorf centrifuge 5424 (Eppendorf microcentrifuge models 5424 and 5424R) are versatile 24-place centrifuges that set new standards for silence, speed, and simplicity in operation. The fixed-angle rotor is best for standard applications and centrifugation of biohazardous or radioactive samples. The miniprep spin column rotor features an extra-high rim to support open tube lids. The PCR tube rotor is best in "knockdown" spin applications for liquids after reaction setup. Certified aerosol-tight rotors have red screw-tops for easy identification. These are the direct replacements for the legendary models 5415D and 5415R.
