Proper Citation: Eukaryotic Promoter Database (RRID:SCR_002132)

Description: Collection of eukaryotic promoters derived from published articles. Annotated non-redundant collection of eukaryotic POL II promoters, for which transcription start site has been determined experimentally. Access to promoter sequences is provided by pointers to positions in nucleotide sequence entries. EPD is structured in a way that facilitates dynamic extraction of biologically meaningful promoter subsets for comparative sequence analysis.

Abbreviations: EPD

Synonyms: The Eukaryotic Promoter Database

Resource Type: data or information resource, database

Defining Citation: [PMID:14681364](#), [PMID:23193273](#), [PMID:31680159](#)

Keywords: Eukaryotic promoters collection, published articles promoter collection, published article, POL II promoter, biologically meaningful promoter, comparative sequence analysis
