Proper Citation: SkateBase (RRID:SCR_005302)

Description: Portal supporting the North East Bioinformatics Collaborative's project to sequence the genome of the Little Skate. Provided is a clearinghouse for Little Skate Genome Project and other publicly available Skate and Ray (Batoidea) genome data, and tools for data visualization and analysis. Little Skate Genome Project The little skate (*Leucoraja erinacea*) is a chondrichthyan (cartilaginous) fish native to the east coast of North America. Elasmobranchs (Skates, Rays, and Sharks) exhibit many fundamental vertebrate characteristics, including a neural crest, jaws and teeth, an adaptive immune system, and a pressurized circulatory system. These characteristics have been exploited to promote understanding about human physiology, immunology, stem cell biology, toxicology, neurobiology and regeneration. The development of standardized experimental protocols in elasmobranchs such as *L. erinacea* and the spiny dogfish shark (*Squalus acanthias*) has further positioned these organisms as important biomedical and developmental models. Despite this distinction, the only reported chondrichthyan genome is the low coverage (1.4x) draft genome of the elephant shark (*Callorhynchus milii*). To close the evolutionary gaps in available elasmobranch genome sequence data, and generate critical genomic resources for future biomedical study, the genome of *L. erinacea* is being sequenced by the North East Bioinformatics Collaborative (NEBC). As close evolutionary relatives, the little skate sequence will facilitate studies that employ dogfish shark and other elasmobranchs as model organisms. Skate tools include the SkateBLAST and the Skate Genome Browsers: Little Skate Mitochondrion, Thorny Skate Mitochondrion, and Ocellate Spot Skate Mitochondrion.

Abbreviations: SkateBase

Resource Type: analysis service resource, data analysis service, data or information resource, database, production service resource, service resource

Keywords: little skate, leucoraja erinacea, sequence, genome, mitochondrion, thorny skate, ocellate spot skate, FASEB list

Funding: NIGMS 3P20GM103446-12S1

Resource Name: SkateBase

Resource ID: SCR_005302

Alternate IDs: nlx_144350

Record Creation Time: 20220129T080229+0000

Record Last Update: 20260903T234753+0000

Ratings and Alerts

No rating or validation information has been found for SkateBase.

No alerts have been found for SkateBase.
