Proper Citation: Helmholtz Center Munich German Research Center for Environmental Health (RRID:SCR_013835)

Description: An institute that investigates important common diseases which develop from the interaction of lifestyle, environmental factors, and personal genetic background, with a strong focus on diabetes mellitus and chronic lung diseases. The institute's research combines biomedical and environmental research with the aim of identifying human health risks at an early stage, identifying and interpreting the mechanisms that cause disease, developing individualized concepts for the long-term prevention and cure of disease, and improving diagnostics. The institute offers diabetes and lung information services, among others, and higher education training programs.
