Description: Perl software for transcription factor binding site detection and analysis. It implements classes for the representation of objects encountered in analysis of these protein-binding sites.

Resource Type: data analysis software, data processing software, software application, software resource

Defining Citation: [PMID:12176838](#), [DOI:10.1093/bioinformatics/18.8.1135](#)

Keywords: protein-binding, transcription factor, factor binding, binding site detection, transcription analysis, perl, bio.tools

Availability: Free, Available for download, No longer in development

Resource Name: TFBS

Resource ID: SCR_015774
