Description: Bechtop thermal cycler. The small foot-print means that this device makes good use of available bench space, allowing this device to fit into any laboratory it will even fit easily on the researcher's personal work bench. The desktop footprint measures only 36 x 21 cm and it stands 22 cm above the desk. Because the air-flow for the cooling system is located at the back of the unit, several machines can be stored and operated side-by-side, with no space between, for efficient space usage.
