Description: Rattus norvegicus with name SD-Trim63^{em1(hiLuc)}/Rrrc from RGD.

Species: Rattus norvegicus

Notes: The use of zinc finger nuclease technology (ZFN) to knockin a luciferase reporter directly downstream of MuRF1 (Trim63) coding sequences in rats, leaving endogenous MuRF1 gene expression intact and bicistronically linking it to the inserted reporter through a hepatitis CIREs (HCV-IRES). The resulting knockin rat line, MuRF1-hiLUCs, has reporter characteristics that are fully reflective of endogenous MuRF1 gene expression, can be used as a universal biomarker of skeletal muscle atrophy in vivo, and has a bioluminescent readout compatible with whole animal imaging modalities.
