Comments: Insert was not sequence confirmed, ends may be different and may contain some internal SNPs (sequence is based on initial cloning design, and not necessarily final cloning design) Please note that Addgene's sequencing results differ from the full sequence information provided by the depositing laboratory by a deletion from bp#115-171, a 21bp insert fragment, and a single nucleotide mismatch at bp#377. These differences are not known to affect the function of the plasmid.
