### Resource Information

**URL:** <http://sites.google.com/site/marcocongedo/software/nica>

**Proper Citation:** Normative Independent Component Analysis (RRID:SCR\_002506)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 13, 2026. Software program, executable under any Windows32 OS, performs Group BSS (Blind Source Separation) analysis comparing two groups of individuals and it performs NICA (Normative ICA) analysis where individuals are compared individually to a (normative) group. All analysis is performed in the frequency domain, that is, for all frequencies. The program also performs all these analysis for qEEG, that is, at the electrode level, without any BSS. The program does all computations, saves and displays results. The rationale and methods used in this program are explained in all details in the following paper: Congedo M, John ER, De Ridder D, Prichep L (2010) Group Independent Component Analysis of Resting-State EEG in Large Normative Samples International Journal of Psychophysiology 78, 89-99.

**Abbreviations:** NICA

**Resource Type:** software application, software resource, data analysis software, data processing software

**Defining Citation:** [PMID:20598764](#)

**Keywords:** eeg, meg, electrocorticography, fourier time-domain analysis, independent component analysis, spectral analysis, statistical operation, temporal transformation, blind source separation

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** Normative Independent Component Analysis

**Resource ID:** SCR\_002506

**Alternate IDs:** nlx\_155906

**Alternate URLs:** <http://www.nitrc.org/projects/nica>

**Record Creation Time:** 20220129T080213+0000

**Record Last Update:** 20260729T044027+0000

---

## Ratings and Alerts

No rating or validation information has been found for Normative Independent Component Analysis.

No alerts have been found for Normative Independent Component Analysis.
