Proper Citation: University of Texas Health Science Center at San Antonio Department of Pharmacology (RRID:SCR_007078)

Description: The Department of Pharmacology at the Health Science Center at San Antonio is uniquely positioned to carry out research into the most relevant areas in pharmacology as well as to deliver superior training in pharmacology. Our faculty use approaches that range from the molecular and cellular through electrophysiology and systems to behavior. The Department of Pharmacology at the University of Texas Health Science Center at San Antonio (UTHSCSA) has 18 tenure-track or tenured faculty, 11 research-track faculty, 15 graduate students, and 15 postdoctoral fellows. We are very excited about recent developments in pharmacology that allow new and challenging means of exploring the biological effects of drugs. Graduate studies leading to a Doctor of Philosophy degree in the basic biomedical sciences at UTHSCSA are offered in the Integrated Multidisciplinary Graduate Program (IMGP). The Department of Pharmacology administers two tracks within the IMGP: the pharmacology track and the neuroscience track. The Department of Pharmacology has a ten-week summer research program that offers participants a variety of experiences that will help prepare them for success in research-intensive doctoral programs. Participants will have research responsibilities, attend seminars, actively participate in a student journal club and take part in formal course work. Prior research experience is not necessary, and students of all undergraduate levels are encouraged to apply.
