### Resource Information

**URL:** <http://www.cma.mgh.harvard.edu/iatr/display.php?spec=id&ids=107>

**Proper Citation:** Extensible MATLAB Medical image Analysis (RRID:SCR\_013499)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE. Documented on June 6, 2023. EMMA (Extensible MATLAB Medical image Analysis) is a toolkit designed to ease the use of MATLAB in the analysis of medical imaging data. It provides functions for reading and writing MINC files, viewing images, performing ROI operations, and performing several popular analyses. Also, there are toolkits for performing kinetic analysis of dynamic PET rCBF (regional cerebral blood flow) and FDG data. The goal for this site is to provide a centrally available listing of all image analysis tools that are available to the neuroscience community in order to facilitate the development, identification, and sharing of tools that are of use to the general community.

**Synonyms:** MINC-EMMA, EMMA

**Resource Type:** software application, software resource, data processing software, data visualization software, software toolkit

**Keywords:** analysis, matlab, medical, neurological, tool, image, toolkit

**Funding:** Human Brain Project

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** Extensible MATLAB Medical image Analysis

**Resource ID:** SCR\_013499

**Alternate IDs:** nif-0000-33081

**Record Creation Time:** 20220129T080316+0000

**Record Last Update:** 20260729T044317+0000

---

## Ratings and Alerts

No rating or validation information has been found for Extensible MATLAB Medical image Analysis.

No alerts have been found for Extensible MATLAB Medical image Analysis.
