## Disease Genes Conserved Sequence Tags Database

RRID:SCR\_000760

Type: Tool

### Proper Citation

Disease Genes Conserved Sequence Tags Database (RRID:SCR\_000760)

### Resource Information

**URL:** <http://dgcst.ceinge.unina.it/>

**Proper Citation:** Disease Genes Conserved Sequence Tags Database (RRID:SCR\_000760)

**Description:** A database of conserved sequence elements, identified by a systematic genomic sequence comparison between a set of human genes involved in the pathogenesis of genetic disorders and their murine counterparts. Human and mouse genomic sequences were compared by BLASTZ. Sequences longer than 100 and with identity better than 70 were selected as CSTs and imported into the database. CSTs are extensively annotated with respect to exon/intron structure and other biological parameters. CST counterparts in other species were identified by using BLAST to scan genomes from other species, and selecting on the basis of homology and co-linearity. The database can be accessed by gene, chromosomal location, graphic browser, DNA features, and coding regions.

**Synonyms:** DG CST Database

**Resource Type:** data or information resource, database

**Defining Citation:** [PMID:15608249](#)

**Keywords:** database, conserved sequence element, genomic sequence, human gene, pathogenesis, genetic disorder, blastz, cst

**Funding:** Telethon Foundation ;  
the Associazione Italiana per la Ricerca sul Cancro (AIRC) ;  
the Federazione Italiana per la Ricerca sul Cancro (FIRC) ;  
the Italian Ministry for Research (MURST) ;  
the National Council for Research (CNR) ;  
Regione Campania ;  
BioGeM

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** Disease Genes Conserved Sequence Tags Database

**Resource ID:** SCR\_000760

**Alternate IDs:** nif-0000-21121

**Record Creation Time:** 20220129T080203+0000

**Record Last Update:** 20260729T044006+0000
