Anorectic Behavior Observation Scale (RRID:SCR_003693)

Resource Information

URL: <http://www.1000livesplus.wales.nhs.uk/sitesplus/documents/1011/ABOS.pdf>

Proper Citation: Anorectic Behavior Observation Scale (RRID:SCR_003693)

Description: A thirty-item diagnostic scale devised to be answered by the parents, spouse or other family member of an individual suspected of having an eating disorder. The questions address three factors; unusual eating behavior, bulimic-type behavior and hyperactivity. The ABOS however does not address the frequency of the observed behavior. The ABOS is scored on a range of from 0-60. There are three possible answers provided per question, each assigned a numerical value: two points for yes, zero for no, and one for don't know. (Adapted from Wikipedia) Scoring: * 0-10 Non-Anorexic * 11-20 Retest Required in 2 Months * 21-30 Anorexic Eating Detected, More Testing Required * 31-60 Severe Anorexia, Seek Professional Guidance. THIS RESOURCE IS NO LONGER IN SERVICE. Documented on July 27,2026.

Abbreviations: ABOS

Synonyms: Anorectic Behavior Observation Scale (ABOS)
