Proper Citation: International Biologics, LLC (RRID:SCR_004212)

Description: International Biologics is a fully accredited American Association of Tissue Banks (AATB) Tissue Bank and Processing Facility --- Accreditation #00162. It receives 100% of its donor tissue from federally licensed Organ Procurement Organizations (OPOs) and other AATB accredited donor sources. International Biologics provides multitudinous bone and soft tissue allografts. Clinical applications for these products include: Orthopedic, Spine, Joint Restoration, Oral Maxillofacial, Podiatry, Periodontal, Urology, Trauma The collection and distribution of donated tissue including soft tissue, bone tissue and organ donation of kidneys, livers and hearts (collectively tissue) are controlled by the Government. Organ Procurement Organizations (OPOs) have long been established in every state to recover tissue from donors. Because there is a very short period following death before tissue breaks down rendering it useless for implantation, OPOs maintain round-the-clock presences in hospitals including grief counseling through procurement personnel. OPO tissue is heavily federally regulated and is therefore the most highly sought tissue because it is universally understood to be the safest tissue for transplant. International Biologics has long-term high-volume OPO tissue supply contracts making it one of the largest recipients of cadaveric bone and soft tissue in the world. International Biologics processes its tissue within a state-of-the-art facility located in Scottsdale, Arizona. The facility includes nine -86C ultra low temperature freezers, 14 tray lyophilization, and four validated class 1000 clean rooms including CNC.
