Description: Genome transcriptome atlas by RNA in situ hybridization on sagittal sections of developing mouse at embryonic day 14.5. Consists of searchable database of annotated images that can be interactively viewed. Anatomy based expression profiles for coding genes and microRNAs, tissue specific genes. Expression data generated by using human and murine tissue arrays.

Abbreviations: Eurexpress

Synonyms: Eurexpress atlas, Transcriptome Atlas Database for Mouse Embryo

Resource Type: atlas, data or information resource, database, expression atlas, image collection
