ExPANdS

RRID:SCR_005199

Type: Tool

Proper Citation

ExPANdS (RRID:SCR_005199)

Resource Information

URL: <http://cran.r-project.org/web/packages/expands/>

Proper Citation: ExPANdS (RRID:SCR_005199)

Description: Software that characterizes coexisting subpopulations (SPs) in a tumor using copy number and allele frequencies derived from exome- or whole genome sequencing input data. The model amplifies the statistical power to detect coexisting genotypes, by fully exploiting run-specific tradeoffs between depth of coverage and breadth of coverage. ExPANdS predicts the number of clonal expansions, the size of the resulting SPs in the tumor bulk, the mutations specific to each SP and tumor purity. The main function `runExPANdS` provides the complete functionality needed to predict coexisting SPs from single nucleotide variations (SNVs) and associated copy numbers. The robustness of the subpopulation predictions by ExPANdS increases with the number of mutations provided. It is recommended that at least 200 mutations are used as an input to obtain stable results.

Abbreviations: ExPANdS

Synonyms: Expanding Ploidy and Allele Frequency on Nested Subpopulations

Resource Type: software resource

Defining Citation: [PMID:24177718](#)

Keywords: copy number, allele, frequency, exome, whole genome, sequencing, ploidy, subpopulation, genotype, mutation, single nucleotide variation

Related Condition: Tumor

Availability: GNU General Public License, v2

Resource Name: ExPANdS

Resource ID: SCR_005199

Alternate IDs: OMICS_00218

Record Creation Time: 20220129T080228+0000

Record Last Update: 20260725T190600+0000

Ratings and Alerts

No rating or validation information has been found for ExPANdS.

No alerts have been found for ExPANdS.
