SUB-cellular location database for Arabidopsis proteins II

RRID:SCR_006668

Type: Tool

Proper Citation

SUB-cellular location database for Arabidopsis proteins II (RRID:SCR_006668)

Resource Information

URL: <http://www.suba.bcs.uwa.edu.au/>

Proper Citation: SUB-cellular location database for Arabidopsis proteins II (RRID:SCR_006668)

Description: SUBA provides a powerful tool to investigate subcellular localization in Arabidopsis. SUBA houses large scale proteomic and GFP localization sets from cellular compartments of Arabidopsis, and also contains pre-compiled bioinformatic predictions for protein subcellular localizations. The Database functions through the unification of disparate datasets and through the provision of a web accessible interface for the construction of user based queries resulting in a one-stop-shop for protein localization in this model plant. Subcellular localization information can contribute towards our understanding of protein function, protein redundancy and of biological inter-relationships. In an attempt to get a clearer picture of our experimental data and to more generally understand subcellular partitioning we have brought together various data sources to build SUBA.

Synonyms: SUBA II

Resource Type: database, data or information resource

Keywords: arabidopsis, arabidopsis genome, gfp, protein subcellular localization, proteomics, subcellular, subcellular localization

Resource Name: SUB-cellular location database for Arabidopsis proteins II

Resource ID: SCR_006668

Alternate IDs: nif-0000-03505

Record Creation Time: 20220129T080237+0000

Record Last Update: 20260808T190405+0000

Ratings and Alerts

No rating or validation information has been found for SUB-cellular location database for Arabidopsis proteins II.

No alerts have been found for SUB-cellular location database for Arabidopsis proteins II.
