Proper Citation: University of Puerto Rico Institute of Neurobiology (RRID:SCR_007528)

Description: The Institute of Neurobiology is an interdisciplinary, interdepartmental research center of the Medical Sciences Campus of the University of Puerto Rico. Its members carry out basic research in Neuroscience, with particular emphasis on the use of simple systems to understand basic mechanisms of nervous system function and development. There are currently 14 full-time faculty members who carry out research and graduate teaching at the Institute. Their research interests range from the development of insect synapses to the anatomy of retinal projections in mammals. Graduate students carrying out research at the Institute are enrolled in Ph.D. and M.Sc. programs in the Medical Sciences Campus and in the Department of Biology, UPR. The Institute houses laboratories equipped for electrophysiology, biochemistry, molecular biology and histology, including confocal and electron microscopy. Located in Old San Juan, the Institute overlooks the Atlantic Ocean and El Morro, the fortress which guards San Juan bay.
