Proper Citation: CHOP Nucleic Acid/Protein Core (RRID:SCR_009728)

Description: Core facility that provides the following services: DNA sequencing service, Oligonucleotide synthesis portal to IDT service, Oligonucleotide purification service, DNA fragment analysis service. The Nucleic Acid/Protein Research Core Facility, located on the 9th floor of the Abramson Building, provides a centralized source for specialized services, technical expertise and reagents to support investigators' molecular biology research needs. These services include DNA sequencing analysis, fluorescent fragment analysis (microsatellite genotyping), oligonucleotide synthesis, microarray services, denaturing high-performance liquid chromatography, Affymetrix GeneChip expression analysis, SNP analysis and RNA analysis.

Resource Type: access service resource, service resource, core facility

Keywords: dna sequencing, oligonucleotide synthesis, dna purification, nucleic acid fragment analysis, microsatellite analysis, genotyping assay, snp interrogation genotyping
