Proper Citation: NHLBI Division of Prevention and Population Sciences (RRID:SCR_011463)

Description: Supports and provides leadership for population- and clinic-based research on the causes, prevention, and clinical care of cardiovascular, lung, and blood diseases and sleep disorders. Research includes a broad array of epidemiological studies to describe disease and risk factor patterns in populations and to identify risk factors for disease; clinical trials of interventions to prevent disease; studies of genetic, behavioral, sociocultural, and environmental influences on disease risk and outcomes; and studies of the application of prevention and treatment strategies to determine how to improve clinical care and public health. The Division also supports training and career development for these areas of research. The Division is organized into four major components: the Epidemiology Branch, the Clinical Applications and Prevention Branch, the Women's Health Initiative Branch, and the Office of Biostatistics Research.

Abbreviations: DPPS, NHLBI DPPS

Synonyms: NHLBI Division of Epidemiology and Clinical Applications, Division of Prevention and Population Sciences

Resource Type: government granting agency

Related Condition: Cardiovascular disease, Lung disease, Blood disease, Sleep disorder

Resource Name: NHLBI Division of Prevention and Population Sciences

Resource ID: SCR_011463

Alternate IDs: nlx_inv_1005056

Record Creation Time: 20220129T080304+0000

Record Last Update: 20260808T185931+0000
