MGH NextGen Sequencing Core

RRID:SCR_012294

Type: Tool

Proper Citation

MGH NextGen Sequencing Core (RRID:SCR_012294)

Resource Information

URL: <http://nextgen.mgh.harvard.edu>

Proper Citation: MGH NextGen Sequencing Core (RRID:SCR_012294)

Description: Core facility that provides the following services: NextGen sequencing, Data Analysis. The NextGen Core is a collaboration between the Department of Molecular Biology, the Center for Human Genetics Research, the Center for Computational Biology, and the Executive Committee on Research (ECOR). Currently, the Core operates using a single Illumina HiSeq instrument, accompanied by Illumina's cBot for cluster generation. This upgrade from our Genome Analyzer II doubled our capacity and greatly increased the data amount, quality, and stability over extra-long reads. The Core is located in the state-of-the-art Richard Simches Research Center on Cambridge St. as part of the MGH main campus in Boston. The many multi-investigator groups in the building - including those that study human genetics, stem cells, genomics, and more - make it the perfect location for the Core to service the researchers in those groups. The majority of customers come from MGH, but they also service customers at other academic medical centers and industry.

Abbreviations: MGH NextGen Core

Synonyms: Massachusetts General Hospital NextGen Sequencing Core, NextGen Sequencing Core (MGH)

Resource Type: access service resource, core facility, service resource

Keywords: next generation sequencing, data analysis

Resource Name: MGH NextGen Sequencing Core

Resource ID: SCR_012294

Alternate IDs: SciEx_11594

Alternate URLs: <http://harvard.eagle-i.net/i/00000135-343e-53d1-0fb7-ab1580000000>,
