Proper Citation: Leica: RM2125 RTS Manual Microtome (RRID:SCR_018040)

Description: Manual rotary microtome that sections tissue samples. Features include precise feed mechanism, powerBase that ensures stable operation for vibration-free sectioning, advanced knife holder and specimen clamp securely align cutting edge to block, user-selectable coarse feed wheel turn direction and retraction functions, hand wheel, in-built safety guards and rounded shape with arm rests for fatigue-free sectioning, quick-exchange specimen clamp and orientation system for object head allow rapid set up for any block, and two trim steps.
