Proper Citation: Warp (RRID:SCR_018071)

Description: Software tool that automates all preprocessing steps of cryo-EM data acquisition and enables real-time evaluation. Corrects micrographs for global and local motion, estimates local defocus and monitors key parameters for each recorded micrograph or tomographic tilt series in real time. Software includes deep-learning-based models for accurate particle picking and image denoising.

Resource Type: data acquisition software, data analysis software, data processing software, software application, software resource

Defining Citation: [DOI:10.1038/s41592-019-0580-y](https://doi.org/10.1038/s41592-019-0580-y)

Keywords: Automating preprocessing step, cryo EM data acquisition, micrograph correction, particle picking, image denoising, bio.tools

Availability: Free, Available for download, Freely available
