Comments: Insert was not sequence confirmed, ends may be different and may contain some internal SNPs (sequence is based on initial cloning design, and not necessarily final cloning design) Please note that Addgene's sequencing results differ from the full sequence information provided by the depositing laboratory by a 21 nucleotide deletion at bp#116-136, a 30 nucleotide deletion at bp#156-185 and a 8 nucleotide deletion at bp#3904-3911. These deletions are not known to affect the function of the plasmid.
