Proper Citation: Adaptively Sampled Particle Fluids (RRID:SCR_000083)

Description: Scalable particle fluid simulation code for Lagrangian particle-based fluid simulation. This adaptive sampling strategy allows using smaller (and thus more) particles in geometrically complex regions, while less particles are used for thick flat fluid volumes. Additionally, a novel distance-based particle surface definition is implemented which hides the particle granularity and allows dynamic resampling near the fluid-air interface. The code is implemented in C++ and should compile on Linux.

Abbreviations: ASPF

Resource Type: source code, software application, software resource, simulation software

Keywords: fluid simulation, lagrangian particle fluid, linux

Availability: Free, Available for download, Freely available

Resource Name: Adaptively Sampled Particle Fluids

Resource ID: SCR_000083

Alternate IDs: nif-0000-23328

License: MIT License

Record Creation Time: 20220129T080159+0000

Record Last Update: 20260801T190107+0000

Ratings and Alerts

No rating or validation information has been found for Adaptively Sampled Particle Fluids.

No alerts have been found for Adaptively Sampled Particle Fluids.
