Proper Citation: TRANSFoRm Data Integration Models (RRID:SCR_003892)

Description: A set of three models, which in conjunction with the semantic mediator enables the execution of queries formulated through the eligibility representation of the Clinical research information model (WT6.4). An ontology-driven mechanism was developed to enable linkage and integration of phenotypic and genotypic data from multiple distributed data sources. It makes use of the Clinical Data Integration Model (CDIM, WT6.5), the Data Source Model (DSM, WT6.6) and the CDIM-DSM mapping model (WT6.6). Queries formulated through the CDIM and vocabulary service (WT7.2) are translated to local queries by the mediator using the individual source instances of the DSM and CDIM-DSM models.

Synonyms: Data Integration Model

Resource Type: narrative resource, report, data or information resource, standard specification

Keywords: clinical, model

Resource Name: TRANSFoRm Data Integration Models

Resource ID: SCR_003892

Alternate IDs: nlx_158223

Record Creation Time: 20220129T080221+0000

Record Last Update: 20260803T040401+0000
