Proper Citation: Store-a-Tooth Stem Cell Bank (RRID:SCR_004252)

Description: Provia Laboratories Inc. offers Store-A-Tooth, the industry-leading dental stem cell banking service for preserving the stem cells found in baby teeth and wisdom teeth. Store-A-Tooth is a service that provides you the opportunity to store the stem cells inside of teeth that come out. Eligible teeth include baby teeth, wisdom teeth, and other healthy teeth that need to be surgically extracted during the normal course of dental care. Store-A-Tooth has been available since 2006 from dentists across the U.S. At the core of our tooth transport device is the Save-A-Tooth device, which is FDA-approved and ADA accepted for the preservation of avulsed teeth. We use Save-A-Tooth for tooth collection and transport to ensure optimal viability of your sample for processing and cryopreservation. Our laboratory is FDA-registered, CLIA-certified, and AABB-accredited.
