Description: The Department of Neurology & Psychiatry aims to 1) provide the best psychiatric and neurological care to patients and their families, 2) discover and investigate new treatments for psychiatric and nervous system disorders, 3) study psychosocial processes in psychiatric and neurological illness, and 4) educate the next generation of practitioners, as well as our patients and the lay community. The Department of Neurology & Psychiatry (DNP) was established on June 1, 2007. The Department has 34 faculty members and is planning continued expansion. There are 7 psychiatrists, 18 neurologists, 4 child neurologists, and 5 NIH-supported PhD investigators. The DNP is one of five departments in the country that combines the disciplines of neurology and psychiatry. We are unique in having two strong residency programs and are the only that attempts to establish a new paradigm in care of patients with neurological and psychiatric disease through co-management initiatives. * Division of Psychiatry: The Psychiatrists work within four areas: Adult, Geriatric, Community, and Forensic Psychiatry. * Division of Neurology: The division has an extremely active stroke/intensive care and general neurology service. We are expanding services in neurocritical care and interventional neurology. * Education: The DNP has approximately 25 residents/fellows in each discipline. * Research: The DNP has robust programs in clinical, basic, and translational research. We emphasize 3 areas in this overview of the DNP. ** Clinical Research Unit ** Psychosocial Processes Group ** Translational Neuromuscular Disease VISION STATEMENT All members of the Saint Louis University Department of Neurology & Psychiatry will collaborate to support state-of-the-art neurological and psychiatric education, compassionate patient care, and a growing research enterprise. The Department will develop the most exciting intellectual environment in the Nation for investigation, treatment, and training in psychiatry and neurology. We will fulfill this Vision in an environment of mutual respect and collaboration.
