Proper Citation: Ohio State Biorepository (RRID:SCR_004714)

Description: The HTRN biospecimen bank is comprised of samples for the Ohio State University Cancer and Leukemia Group B Pathology Coordinating Office (CALGB-PCO) and the Ohio State University Midwestern Division of the Cooperative Human Tissue Network (CHTN). The CALGB-PCO banks biospecimens donated by patients enrolled in clinical trials. Samples can include tumor and normal tissue, plasma, serum, whole blood and white blood cells and urine. All of these samples are used later in correlative studies. The Midwestern Division of the CHTN stores a temporary biospecimen bank of tumor and normal tissue, tissue slides and paraffin embedded tissue blocks for research investigators throughout the country and Canada who are trying to find a cure for cancer. As part of the HTRN biospecimen bank, a Rees Scientific equipment monitoring system helps to secure the integrity and quality of samples stored in the biorepository. Scientific research within the HTRN is currently underway to determine the best methods in tissue storage for long term use. The NCI First-Generation Guidelines for NCI-Supported Biorepositories and the NCI Best Practices for Biospecimen Resources are continuously reviewed and adapted by the HTRN.

Abbreviations: HTRN Biospecimen Bank

Synonyms: Human Tissue Resource Network Biospecimen Bank, HTRN Biorepository Biospecimen Resource, HTRN Biorepository & Biospecimen Resource, HTRN Biorepository and Biospecimen Resource, HTRN Biorepository

Resource Type: biomaterial supply resource, material resource, tissue bank

Keywords: tumor tissue, normal tissue, plasma, serum, whole blood, white blood cell, urine, blood, tissue, tissue slide, paraffin embedded tissue block, slide, paraffin, cancer, leukemia, research

Related Condition: Cancer, Leukemia, Tumor

Funding: NCI

Availability: Private and Public (USA and Canada): Serves the Ohio State University Cancer and Leukemia Group B Pathology Coordinating Office (CALGB-PCO) and the Ohio State University Midwestern Division of the Cooperative Human Tissue Network (CHTN). The Midwestern Division of the CHTN stores a temporary biospecimen bank of tumor and normal tissue, Tissue slides and paraffin embedded tissue blocks for research investigators throughout the country and Canada who are trying to find a cure for cancer.
