Proper Citation: South Carolina Biorepository System (RRID:SCR_005034)

Description: The South Carolina Biorepository System (SCBS), directed by Dr. Phil Buckhaults, School of Medicine, is a statewide tissue bank working with health care facilities across South Carolina to collect tumor and matched normal tissue samples from patients with cancer, and providing these samples to researchers statewide. All specimens are de-identified to protect patient privacy, but are annotated with essential, detailed clinical data. Currently, the SCBS inventory includes specimens from the leading types of cancers in South Carolina: breast, colorectal, lung, and prostate, as well as many other cancer sites. The ultimate goal is to improve the lives of cancer patients and their families.

Abbreviations: SCBS

Resource Type: biomaterial supply resource, tissue bank, material resource

Keywords: tissue, normal, tumor, tumor tissue, matched normal tissue, cancer, breast cancer, colorectal cancer, lung cancer, prostate cancer, clinical data

Related Condition: Cancer, Breast cancer, Colorectal cancer, Lung cancer, Prostate cancer

Availability: Public (South Carolina): The South Carolina Biorepository System (SCBS) is a statewide tissue bank working with health care facilities across South Carolina to collect tumor and matched normal tissue samples from patients with cancer, And providing these samples to researchers statewide.
