Proper Citation: Gene Map Annotator and Pathway Profiler (RRID:SCR_005094)

Description: GenMAPP is a free computer application designed to visualize gene expression and other genomic data on maps representing biological pathways and groupings of genes. Integrated with GenMAPP are programs to perform a global analysis of gene expression or genomic data in the context of hundreds of pathway MAPPs and thousands of Gene Ontology Terms (MAPPFinder), import lists of genes/proteins to build new MAPPs (MAPPBuilder), and export archives of MAPPs and expression/genomic data to the web. The main features underlying GenMAPP are: *Draw pathways with easy to use graphics tools *Color genes on MAPP files based on user-imported genomic data *Query data against MAPPs and the GeneOntology Enhanced features include the simultaneous view of multiple color sets, expanded species-specific gene databases and custom database options.

Synonyms: GenMAPP

Resource Type: data processing software, data visualization software, software application, software resource

Defining Citation: [PMID:17588266](#)

Keywords: expression, gene, analysis, biological, mapping, microarray, network, pathway, protein, visualization, ontology, proteomics, FASEB list

Funding: Agilent Foundation ;
BayGenomics ;
NIGMS

Resource Name: Gene Map Annotator and Pathway Profiler

Resource ID: SCR_005094

Alternate IDs: nif-0000-00244

Record Creation Time: 20220129T080228+0000

Record Last Update: 20260829T182207+0000

Ratings and Alerts

No rating or validation information has been found for Gene Map Annotator and Pathway Profiler.

No alerts have been found for Gene Map Annotator and Pathway Profiler.
