Proper Citation: American Academy of Neurology Research Fellowship Program (RRID:SCR_005102)

Description: The Research Fellowship Program of the AAN Foundation is focused on one critical need that crosses all disciplines: the need to recruit and train clinical researchers in neurology. This program funds research in neurological sciences and offers clinical research fellowships and young investigators fellowships; professional development awards. The scientific and medical communities have called the shortage of investigators a crisis that will impact far more than the 50 million Americans currently suffering from a neurological disease. Recognizing this critical need for neurology research, the AAN Foundation has dedicated its grant making efforts toward investing in young researchers. NIH funding for neurologic research has remained the same for the last four years and competition for NIH funds has intensified. The increase in AAN's fellowships have kept the dream alive for many of our young clinician-researchers. For several years in a row, AAN fellowship recipients have gone on to receive NIH funding at record levels. AAN fellowships are the first step to a broader base of support. The AAN Foundation has identified and developed several funding mechanisms to help achieve this goal:

- * Clinical Research Training Fellowships are mentored awards designed for relatively new investigators in the early-to-mid stages of their training in clinical research methodology.
- * Clinician-Scientist Development Awards are three-year awards to support clinical research leading to discovery of new therapies in specific disease areas.
- * Practice Research Training Fellowships are two-year awards to support training in clinical practice research and are intended to create unique training opportunities, previously difficult to access for neurologists.
- * AHA/ASA/AANF Lawrence M. Brass M.D. Stroke Research Postdoctoral Fellowship A two year award offers support to a postdoctoral fellow with a preference for trainees in vascular neurology, stroke, neurocritical care, or outcomes research.

Abbreviations: AAN Research Fellowship Program

Synonyms: AAN Foundation Research Fellowship Program

Resource Type: funding resource, training resource

Keywords: fellowship, award, grant, neurological disease

Funding: American Academy of Neurology

Resource Name: American Academy of Neurology Research Fellowship Program

Resource ID: SCR_005102

Alternate IDs: nlx_144114

Record Creation Time: 20220129T080228+0000

Record Last Update: 20260821T042645+0000

Ratings and Alerts

No rating or validation information has been found for American Academy of Neurology Research Fellowship Program.
