BrainSitu: A homepage for molecular neuroanatomy

RRID:SCR_008081

Type: Tool

Proper Citation

BrainSitu: A homepage for molecular neuroanatomy (RRID:SCR_008081)

Resource Information

URL: <http://www.nibb.ac.jp/brish/indexE.html>

Proper Citation: BrainSitu: A homepage for molecular neuroanatomy (RRID:SCR_008081)

Description: Database of detailed protocols for single and double in situ hybridization (ISH) method, probes used by Yamamori lab and others useful for studies of brain, and many photos of mammalian (mostly mouse and monkey) brains stained with various gene probes. Also includes a brain atlas of gene expression. Currently, the atlas comprises a series of un-annotated images showing the localization of a particular probe or molecule, e.g., AChE.

Abbreviations: BrainSitu

Resource Type: atlas, narrative resource, expression atlas, data or information resource, database, image, experimental protocol

Keywords: function, gene expression, gene, anatomical structure, brain, central nervous system, cerebral cortex, in situ hybridization, mammalian, neocortex, pcr cloning, probe, molecular neuroanatomy resource, neuroanatomy, in situ hybridization protocol

Resource Name: BrainSitu: A homepage for molecular neuroanatomy

Resource ID: SCR_008081

Alternate IDs: nif-0000-11633

Record Creation Time: 20220129T080245+0000

Record Last Update: 20260803T040522+0000

Ratings and Alerts

No rating or validation information has been found for BrainSitu: A homepage for molecular neuroanatomy.

No alerts have been found for BrainSitu: A homepage for molecular neuroanatomy.
