Description: The mission of the CCMTR is to promote scientific discovery and facilitate its clinical application to achieve the goal of improving the health of animals and humans. The needs of the patients direct the emphasis of basic research, patient samples provide the critical resource to investigate the basis of disease, and patient participation in clinical studies is required to generate the evidence needed to apply new drugs, vaccines and technology to the broader patient population. Initiatives at the Center are designed to develop the multidisciplinary teams necessary to bring an idea from the lab to the patient. The Center is home to service cores that provide advanced technology, collect and store clinical patient samples, and perform clinical trials to validate new medical interventions. North Carolina State University's College of Veterinary Medicine (CVM) is a dynamic community whose members are dedicated to preparing veterinarians and veterinarian scientists while advancing animal and human health from the cellular level through entire ecosystems.

Abbreviations: CCMTR

Resource Type: portal, organization portal, data or information resource, department portal

Keywords: drug, ecosystem, clinical, discovery, disease, health, human, patient, research, scientific, technology, vaccine, veterinary

Resource Name: Center for Comparative Medicine and Translational Research

Resource ID: SCR_008299

Alternate IDs: nif-0000-24380

Old URLs: <http://cvm.ncsu.edu/ccmtr/index.htm>

Record Creation Time: 20220129T080246+0000

Record Last Update: 20260805T044207+0000

Ratings and Alerts

No rating or validation information has been found for Center for Comparative Medicine and Translational Research.
