Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented July 5, 2018. A national center for biospecimen science and standards to advance cancer research and treatment. It was created in response to the critical and growing need for high-quality, well-documented biospecimens for cancer research. The initiative builds on resources already developed by the NCI, including the Biospecimen Research Network and the NCI Best Practices for Biospecimen Resources, both of which were developed to address challenges around standardization of the collection and dissemination of quality biospecimens. caHUB will develop the infrastructure for collaborative biospecimen research and the production of evidence-based biospecimen standard operating procedures.

Abbreviations: caHUB

Synonyms: The Cancer Human Biobank, cancer Human Biobank

Resource Type: data or information resource, narrative resource, standard specification

Keywords: biospecimen, clinical, biomaterial supply resource, tissue

Related Condition: Cancer

Funding: NCI ;
ARRA

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: caHUB

Resource ID: SCR_009657

Alternate IDs: nlx_156094

Record Creation Time: 20220129T080254+0000

Record Last Update: 20260729T044228+0000
