Proper Citation: Vanderbilt Genetic Studies Ascertainment Core (RRID:SCR_010179)

Description: Ascertainment for genetic studies is a crucial and labor-intensive effort. The Genetic Studies Ascertainment Core offers a variety of services to Vanderbilt clinical and basic researchers interested in or currently conducting research involving genetic analysis of complex disorders. We can aid in the development and coordination of individual and family based genetic studies. The faculty and staff have expertise in the issues that need to be considered when setting up a genetic study and are qualified to discuss with individuals issues that might be raised by participation in a genetic study. We can provide services for you or assist you in developing your own program. Study consultations are available to determine cost, time, and personnel needs as well as the best method of ascertainment for your project.
