Multivariate Analysis of Transcript Splicing

RRID:SCR_013049

Type: Tool

Proper Citation

Multivariate Analysis of Transcript Splicing (RRID:SCR_013049)

Resource Information

URL: <http://rnaseq-mats.sourceforge.net/>

Proper Citation: Multivariate Analysis of Transcript Splicing (RRID:SCR_013049)

Description: Software tool to detect differential alternative splicing events from RNA-Seq data. Calculates P value and false discovery rate that difference in isoform ratio of gene between two conditions exceeds given user defined threshold. Can automatically detect and analyze alternative splicing events corresponding to all major types of alternative splicing patterns. Handles replicate RNA-Seq data from both paired and unpaired study design.

Abbreviations: MATS

Synonyms: RNAseq MATS, RMATS, rMATS, MATS, RNA MATS

Resource Type: data processing software, data analysis software, software application, software resource

Keywords: Differential alternative splicing events, splicing events calculation, RNA-Seq data, gene isoform ratio, alternative splicing patterns, patterns detection, patterns analysis, replicate RNA-Seq data

Availability: Free, Available for download, Freely available

Resource Name: Multivariate Analysis of Transcript Splicing

Resource ID: SCR_013049

Alternate IDs: OMICS_01336, SCR_020941

License: 2-Clause BSD License

Record Creation Time: 20220129T080314+0000

Record Last Update: 20260801T190445+0000

Ratings and Alerts

No rating or validation information has been found for Multivariate Analysis of Transcript Splicing.

No alerts have been found for Multivariate Analysis of Transcript Splicing.
