Description: Collection of software tools for the computational analysis of brain anatomy with MRI data. It includes automated software tools from surface reconstruction to their mapping via metric optimization in the Laplace-Beltrami embedding space. It is general and can be applied to a wide range of anatomical structures including cortical, sub-cortical, and fiber bundle surfaces.

Synonyms: Metric Optimization for Computational Anatomy (MOCA), Metric Optimization for Computational Anatomy

Resource Type: software resource, software toolkit

Keywords: computational analysis, brain anatomy, mri data, laplace-beltrami embedding space, metric optimization

Funding: NIBIB K01EB013633;
