Proper Citation: Tecan: Infinite M200 Pro Multimode Microplate Reader (RRID:SCR_019033)

Description: Tecan Infinite M200 Pro is multi-detection microplate reader used for biological applications including protein quantification, ELISA, binding studies, DNA quantification, gene expression, immunoassays, toxicity, cell viability, RNA quantification, cell-based and enzyme assays. This modular Tecan plate reader is monochromator based system, with no need for filters, giving range from 230-1000 nm Abs or 300-600nm FI in 1 nm steps. With spectrally enhanced, red-sensitive PMT, the FI range extends to 330-850nm for NIR readings. Modules featured can be Monochromator absorbance, fluorescence top, fluorescence bottom, Luminescence, Incubation, injection, and enhanced photomultiplier tube (PMT) for red sensitivity that brings the detection limit to 45 pM. Please see individual SKU numbers for a list of installed modules. Heating module that's installed on the microplate reader, allows for the chamber to keep at 37°C for those temperature sensitive samples. Can read microplates from 6 up to 384 well plates, along with PCR plates. Tecan M200 Microplate Reader is driven by Magellan software, which allows you to easily navigate run from start to finish. The user can choose from predetermined assays or build their own from scratch.

Synonyms: Tecan Infinite M200 Pro, Infinite M200 Pro

Resource Type: instrument resource

Keywords: Tecan, Plate Reader, multi-detection microplate reader, assays reader, protein quantification, ELISA, binding studies, DNA quantification, gene expression, immunoassays, toxicity, cell viability, RNA quantification, cell based assays, enzyme assays,

Availability: Restricted

Resource Name: Tecan: Infinite M200 Pro Multimode Microplate Reader
