Description: Canadian data repositories project. Data submitted to FRDR is housed on Compute Canada managed infrastructure at University of Victoria, BC or at University of Waterloo, ON. Research data submitted to FRDR does not leave Canada. Most of metadata is shared with Globus, running on Amazon Web Services in the USA, to be indexed and made available for discovering datasets. Certain metadata fields, for example, submitter contact information, are not shared with Globus. Larger uploads are made using Globus, only public metadata is stored there.
