Proper Citation: University of Pennsylvania School of Dental Medicine Tissue Processing Laboratory Core Facility (RRID:SCR_022863)

Description: Laboratory is located in Room 429 of the Levy Building. Services include tissue processing; H&E staining, trichrome, and other staining; creation of frozen sections; and deparaffinization. Provides cryostat for use by investigators within Penn Dental Medicine; cryostat training is available for a fee. Investigators requiring the services of the Tissue Processing Laboratory should contact the facility to arrange a meeting to set up the appropriate protocols. Special handling, specimen orientation, and any unique aspects of the tissue being processed will be discussed at that time; in some instances, it may be advantageous for the investigator to be present initially when the specimens are being oriented in the hot paraffin prior to the actual sectioning.
