## National Resource for Imaging Mass Spectrometry

RRID:SCR\_001416

Type: Tool

### Proper Citation

National Resource for Imaging Mass Spectrometry (RRID:SCR\_001416)

### Resource Information

**URL:** <http://www.nrims.harvard.edu/>

**Proper Citation:** National Resource for Imaging Mass Spectrometry (RRID:SCR\_001416)

**Description:** Biomedical technology research center with the focus on the application to biomedical research of a new generation of secondary ion mass spectrometer (SIMS), the Multi-Isotope Imaging Mass Spectrometer (MIMS). MIMS is an ion microscope and an ion counter. MIMS provides high mass separation at high transmission ( $M/\lambda M > 10,000$ ), high spatial resolution (40 nm) and has the unique capability of simultaneously recording several atomic mass images. Of the utmost importance, MIMS makes it possible for the first time (and at the intracellular level) to simultaneously image the distribution and measure the accumulation of molecules labeled with any isotopes, in particular with stable isotopes, for example with  $^{15}\text{N}$ . Thus, MIMS allows one to study localization, accumulation and turnover of proteins, fats, sugars and foreign molecules in cellular microdomains, donor-receiver cellular trafficking, stem cell nesting and localization of drugs. Their aim is to be a technological, methodological, and intellectual resource for researchers from a variety of disciplines. They seek to explore and develop the unique capabilities of MIMS and to bring cutting-edge information to biology and medicine that is currently unobtainable using existing technologies.

**Abbreviations:** NRIMS

**Resource Type:** training resource, biomedical technology research center

**Keywords:** mass spectrometer, mass spectrometry, ion microscope, ion counter, imaging, ion, molecule

**Funding:** NIBIB P41 EB001974-13

**Resource Name:** National Resource for Imaging Mass Spectrometry

**Resource ID:** SCR\_001416

**Alternate IDs:** nlx\_152638

**Record Creation Time:** 20220129T080207+0000

**Record Last Update:** 20260729T044011+0000
