Proper Citation: vsn (RRID:SCR_001459)

Description: Software package that implements a method for normalizing microarray intensities, both between colours within array, and between arrays. The method uses a robust variant of the maximum-likelihood estimator for the stochastic model of microarray data described in the references. The model incorporates data calibration (a.k.a. normalization), a model for the dependence of the variance on the mean intensity, and a variance stabilizing data transformation. Differences between transformed intensities are analogous to normalized log-ratios. However, in contrast to the latter, their variance is independent of the mean, and they are usually more sensitive and specific in detecting differential transcription.

Abbreviations: vsn

Synonyms: vsn - Variance stabilization and calibration for microarray data

Resource Type: software resource

Keywords: microarray, preprocessing, bio.tools

Availability: Free, Available for download, Freely available

Resource Name: vsn

Resource ID: SCR_001459

Alternate IDs: OMICS_01977, biotools:vsn

Alternate URLs: <https://bio.tools/vsn>

License: Artistic License, v3

Record Creation Time: 20220129T080207+0000

Record Last Update: 20260905T132434+0000

Ratings and Alerts

No rating or validation information has been found for vsn.

No alerts have been found for vsn.
